

# REYNAERS HANDLES

overview of handles for windows, doors, sliding,  
folding and lift & slide doors

REYNAERS  
aluminium

# 1. PURITY®

## EXCLUSIVE AND ELEGANT DESIGN

For people who desire ultimate design and top quality, a unique Reynaers handle series is created, called PuRity. This series combines next-generation material and mechanical properties with the superior Italian design abilities of designer Leo De Carlo. PuRity is innovative and distinctive in terms of material, design and installation. The PuRity range is suited for all Reynaers windows, doors, sliding doors and lift&slide doors.

## MATERIAL

PuRity handles are made of a brand new material called PURA which is fully recyclable, 100% ecological, non-corrosive and anti-allergic. The unique BIOV or "Bioecologic Ion Overlay" process finishing is based on the deposition of gaseous metal ions, applied under vacuum. This coating is 100% ecological and recyclable which makes the handles extremely resistant against wear, very suited for aggressive environments and as an option even anti-bacterial. The combination of the material and surface treatment makes PuRity a sustainable handle!

## DESIGN

The PuRity range is fully adapted to the use- and design needs of constructors. The result is a minimal, classical and rational design that will give the Reynaers systems a unique touch.

## INSTALLATION

We also provide the handles with their own unique new-generation mechanism, named Cliq-Claq. This mechanism slides over the square spindle of the doors or windows, and then snaps into place. Consequently, it ensures stronger fixation and allows the handle to return to the perfect position.

## PURITY COLOURS

## 2. CLASSIC LINE

### SOMETHING FOR EVERYONE!

Reynaers offers the Classic Line that is suitable for every style. The Classic handle line is a range of high quality products in terms of functionality and design. The Classic handles can be ordered in several finishing features.

## HORIZON

Horizon is a very modern handle in the Reynaers range. The sleek design makes it ideal in combination with any type of window or door. The handle is characterised by the horizontal detail which gives it a very special effect.

## SHIELD

Shield is our safest and strongest series of handles. Created to withstand thieves, these handles are characterized by their rugged, robust and reliable design. Shield received two SKG stars on most of the range and on some specific articles even three stars as a safety score.

## ORCHID

Orchid is a beautiful and elegant series. These handles are very reliable and cost efficient. The series is characterized by the rounded design that radiates in its simplicity.

## OLIMPO

The OLIMPO LINE introduces an up-to-date design that meets the latest aesthetic trends. The smooth shape of the Olimpo line is enhanced by the many finishes available which contribute to meet the highest quality and aesthetical requirements.

## ELEMENTRY

Elementry is a range of handles that is appropriate for other design solutions.

## **ABOUT REYNAERS ALUMINIUM**

Reynaers Aluminium is a leading European specialist in the development and marketing of innovative and sustainable aluminium solutions for windows, doors, curtain walling, sliding systems, sun screening and conservatories. Besides offering an extensive range of standard solutions, the company also develops solutions that are tailored to the individual customer or project. Research, product development and testing are conducted at the Reynaers Institute, the sector's largest private innovation and testing centre, located in Duffel (Belgium). In addition, the company also provides extensive technical support and advice to fabricators, contractors and architects.
